

A tool quality suite to help the developers to maintain health and code evolution

drtools.dev

Quem sou eu?

glacerda@wildtech.com.br @guilhermeslac

- ✓ Mestre e Doutorando em Ciência da Computação (UFRGS)
- ✓ Professor de Graduação (UniRitter) e Pós-Graduação (UniRitter, Unisinos, UFRGS)
- ✓ Consultor associado da Wildtech
- ✓ Pioneiro em Metodologias Ágeis no Brasil
- ✓ Fundador do XP-RS/GUMA
- ✓ Membro da ScrumAlliance , IASA, SBC e ACM

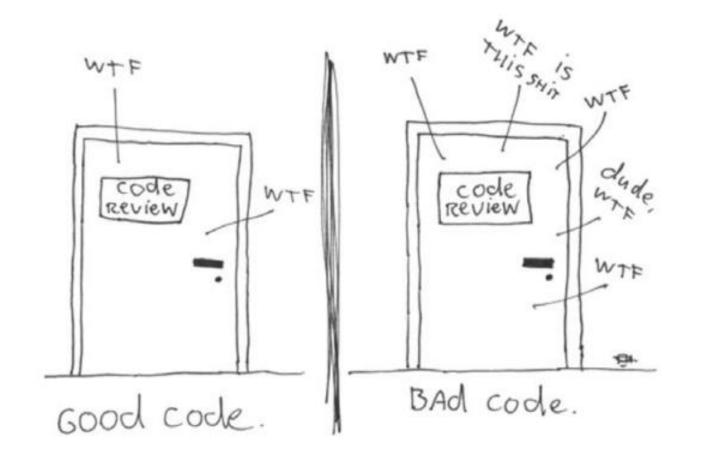

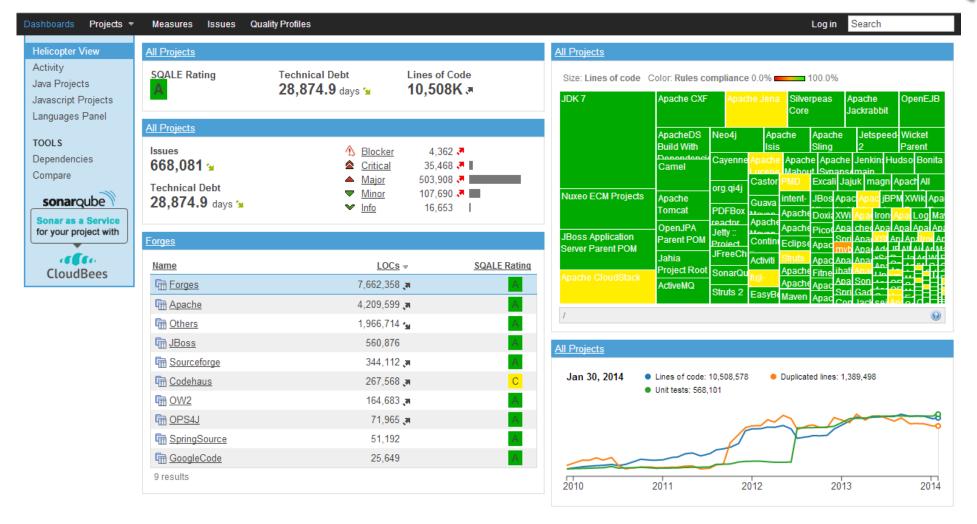

Como você mede a qualidade do código?

he only valid measurement of code Quality: WTFs/minute

"ah... Nós temos o SonarQube"

Se eu baixar um projeto do GitHub, onde estão os maiores problemas?

Características

- ✓ Simplicidade, valor do XP
- **✓** CLI (command line interface)
- Versatilidade
- ✓ Download and run! (pré-requisito: JRE 8)
- ✓ Seleção de métricas, correlacionadas e ordenadas
- ✓ Visualizações usando Google Chart e D3.js
- Atualmente analisa projetos Java

Funções

- ✓ Resultados em diferentes formatos Console, JSON, CSV
- ✓ Filtragem dos 'Top X'
- ✓ Resultados contextualizados *Projeto, Namespaces, Classes, Métodos, Acoplamento, Dependências*

Métricas Contextualizadas

✓ Sumário do Projeto

Total de Namespaces, Classes, SLOC, Métodos e CYCLO

- ✓ Namespaces NOC, NAC
- ✓ Classes

 SLOC, NOM, WMC/CYCLO, DEP, I-DEP/Fan-Out, NPM, NOA
- ✓ Métodos *MLOC, CYCLO, CALLS, NBD, PARAM*
- ✓ Acoplamento

 CA, CE, Instability, Abstractness, Normalized Distance
- ✓ Dependências Externas, Internas, Ciclic Dependency

Uso

C:\Program Files\cmder λ drtools-metric drtools-metric - helping you to improve the health of your source code and reduce technical debt! Developed by Guilherme Lacerda (guilhermeslacerda@gmail.com) Usage: drtools-metric conject-directory> <OPTIONS> <OUTPUT> [--top <number>] OPTIONS = <-a|-ac|-s|-n|-t|-m|-d|-cd|-id|-c|-mt> OUTPUT = <--console|--csv|--json> Where show the results to console list ALL metrics (namespaces/types/methods) --console list ALL metrics about COUPLING/DEPENDENCIES generate results in CSV format --csv list a SUMMARY of project --ison generate results in JSON format list information about NAMESPACES --top list top 'number' records, based on used format list information about TYPES (classes) list information about METHODS (functions) -m list information about DEPENDENCIES of types/classes list information about CYCLIC DEPENDENCIES of types/classes -cd -id list information about INTERNAL DEPENDENCIES of types/classes list information about COUPLING of namespaces list information about METRIC THRESHOLDS -mt Metrics - Number of types/classes outside this component that depends on types/classes inside this component (Afferent Coupling) - Number of types/classes inside this component that depends on types/classes outside this component (Efferent Coupling) - Instability of namespace (range between 0=Maximally stability and 1=Maximally instability) - Abstractness degree of namespace (range between 0=Minimally abstractness and 1=Maximally abstractness) - Normalized distance of namespace from the main sequence Number of abstract types/classes of package/namespace WMC - Weighted methods per types/classes (sum the CYCLO of each method) - Number of types/classes of package/namespace SLOC - Number of lines of source code DEP - Number of type/classes external dependencies I-DEP - Number of type/classes internal dependencies (Fan-Out) NOA - Number of attributes/variables NOM - Number of methods/functions of a type NPM - Number of public methods/functions of a type NBD - Number of nested block depth of a method/function MLOC - Number of lines of a method/function PARAM - Number of parameters of a method/function CYCLO - Cyclomatic complexity (McCabe) of a method/function CALLS - Number of invocations made from within a method/function Usage examples: Example 1 : # drtools-metric \Project\Java\src -a --console Example 2 : # drtools-metric \Project\Java\src -t --csv Example 3 : # drtools-metric \Project\Java\src -m --console --top 10

SUMMARY OF METRICS
            Total of Namespaces: 11
                 Total of Types: 39 - 3,55 (number of types/namespaces)
                 Total of SLOC: 2106 - 54,00 (number of SLOC/types)
               Total of Methods: 278 - 7,13 (number of methods/types)
                 Total of CYCLO: 446 - 11,44 (number of CYCLO/types)
        Processing time: 960 milliseconds
C:\Program Files\cmder
λ drtools-metric D:\JavaApps\Plugins\DrToolsMetric\src -mt --console
INFORMATION ABOUT METRIC THRESHOLDS
Small Project (SMALL)
                                                       small project with < 50 KLOC or 200 < classes
Medium Project (MEDIUM)
                                                       medium project with (50 KLOC <= project <= 250 KLOC) or (200 <= classes <= 1000)
Large Project (LARGE)
                                                       large project with > 250 KLOC or > 1000 classes
Number of Types/Classes (NOC)
                                                       Good: <= 11; Regular: between 11 and 28; Bad: > 28
Number of Abstract Types/Classes (NAC)
                                                       without references
Type/Class Line of Code (SLOC)
                                                       Bad: > 500
Number of Functions/Methods (NOM)
                                                       Good: <= 6; Regular: between 6 and 14; Bad: > 14
Weighted Methods per Class (WMC)
                                                       Good: <= 11; Regular: between 11 and 34; Bad: > 34
Number of external types/classes dependencies (DEP)
                                                       Bad: > 20
Number of internal types/classes dependencies (I-DEP) Bad: > 15
Number of Public Methods (NPM)
                                                       Good: <= 10; Regular: between 11 and 40; Bad: > 40
Number of Attributes/Fields (NOA)
                                                       Good: <= 3; Regular: between 3 and 8; Bad: > 8
Method Lines of Code (MLOC)
                                                       Good: <= 10; Regular: between 10 and 30; Bad: > 30
Cyclomatic Complexity (CYCLO)
                                                       Good: <= 2; Regular: between 2 and 4; Bad: > 4
                                                       without references
Number of Invocations (CALLS)
Nested Block Depth (NBD)
                                                       Good: <= 1; Regular: between 1 and 3; Bad: > 3
Number of Parameters (PARAM)
                                                       Good: <= 2; Regular: between 2 and 4; Bad: > 4
Afferent Coupling (CA)
                                                       Good: <= 7; Regular: between 7 and 39; Bad: > 39
Efferent Coupling (CE)
                                                       Good: <= 6; Regular: between 6 and 16; Bad: > 16
                                                       range between 0=Maximally stability and 1=Maximally instability
Package Instability (I)
Abstractness Degree (A)
                                                       range between 0=Minimally abstractness and 1=Maximally abstractness
Normalized Distance (D)
                                                       range between 0=exactly located in the main sequence and 1=far from the main sequence

Metric Visualization

A tool quality suite to help the developers to maintain health and code evolution

Metric Thresholds Information

Project: Software Pathfinder

Back

PROJECT

Acronym	Name	Description
SMALL	Small Project	small project with < 50 KLOC or 200 < classes
MEDIUM	Medium Project	medium project with (50 KLOC <= project <= 250 KLOC) or (200 <= classes <= 1000)
LARGE	Large Project	large project with > 250 KLOC or > 1000 classes

NAMESPACE

Acronym	Name	Description
NOC	Number of Types/Classes	Good: <= 11; Regular: between 11 and 28; Bad: > 28
NAC	Number of Abstract Types/Classes	without references

TYPE

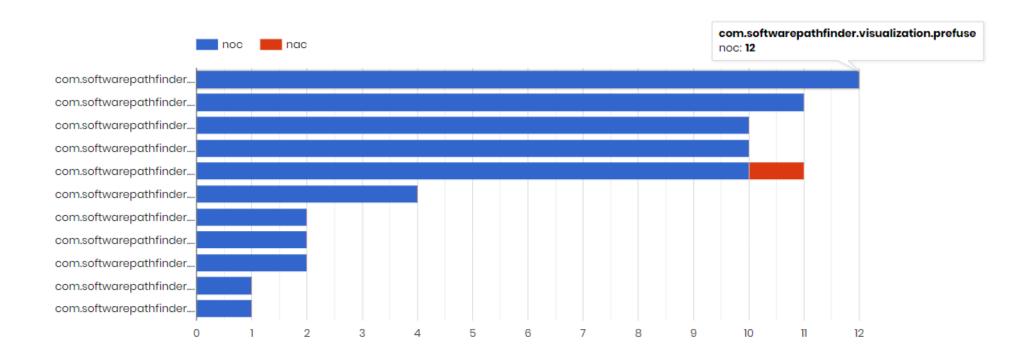

Acronym	Name	Description
SIOC	Type/Class line of Code	Book > 500

Namespace Visualization

NOC (Number of Classes/Types) and NAC (Number of Abstract Classes/Types)
Project: Software Pathfinder

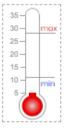

Thermometer Visualization

Project: Software Pathfinder

Back

Types (types/namespaces)

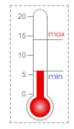

Total of Namespaces: 13

Total of Types: 65

Types/namespaces: 5

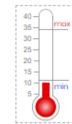

Total of SLOC: 4665

Methods (methods/types)

Total of Methods: 402 Methods/Types: 6

Complexity (WMC/types)

Total of Complexity: 673 Complexity/Types: 10

Type Visualization

Types with Number of Methods/Functions (NOM - y axis), Lines of Code (SLOC - x axis), Complexity (WMC - bubble color), and Dependencies (DEP - bubble size)

Project: Software Pathfinder

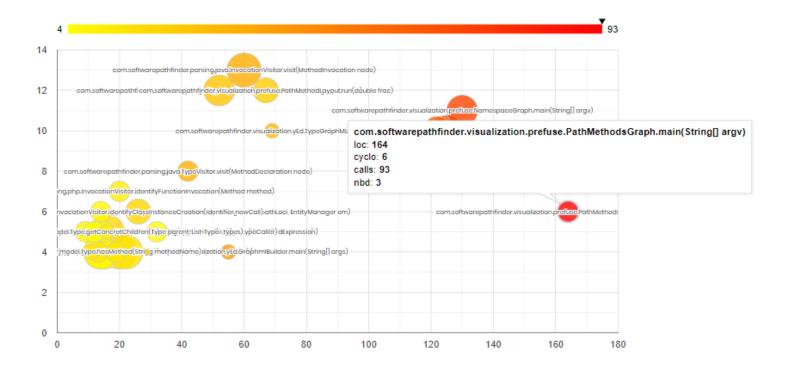

Method Visualization

Methods with Complexity (CYCLO - y axis), Lines of Code (MLOC - x axis), Number of Invocations (CALLS - bubble color), and Nested Block Depth (NBD - bubble size)

Project: Software Pathfinder

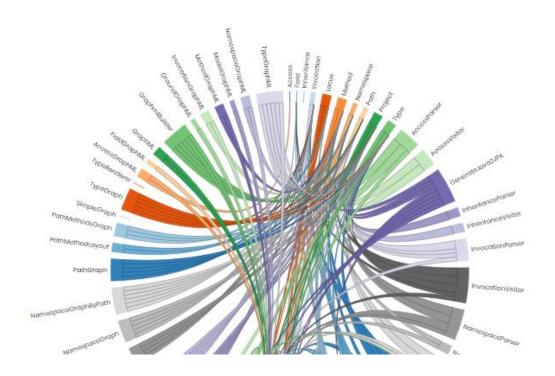

Internal Dependencies Visualization

Internal dependencies between type/classes
Project: Software Pathfinder

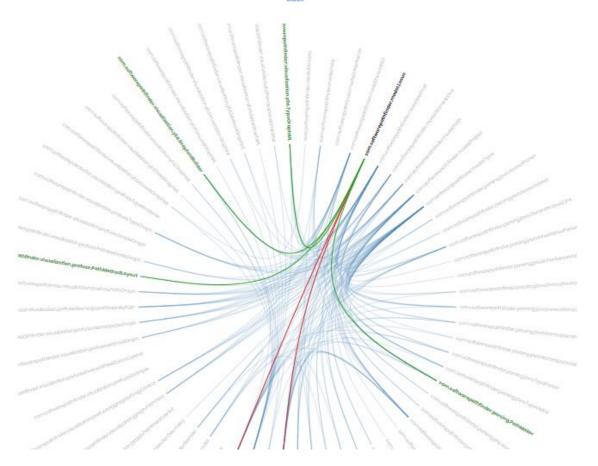

Coupling (Input and Output) Visualization

Red lines (output coupling) and green lines (input coupling)

Project: Software Pathfinder

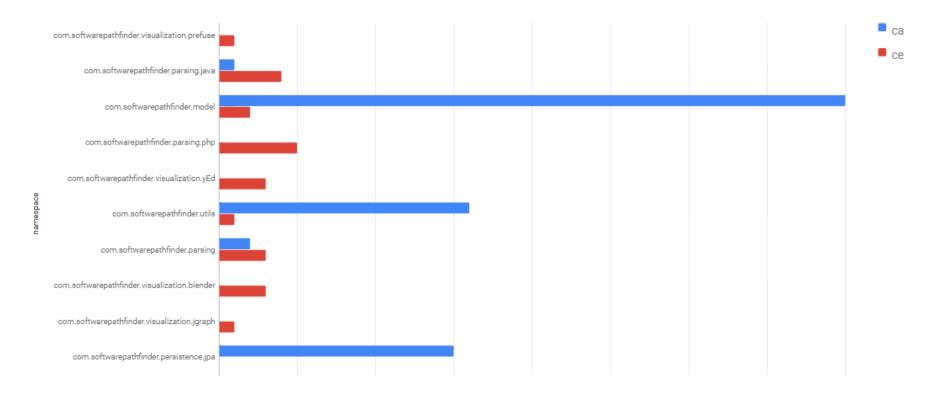

Namespace Coupling Visualization

CA (Afferent Coupling) and CE (Efferent Coupling)

Project: Software Pathfinder

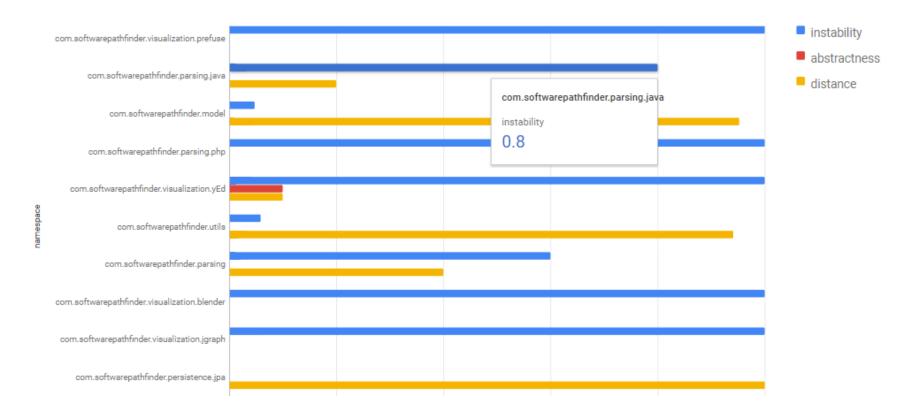

Instability/Abstractness/Distance Visualization

I (Instability), A (Abstractness Degree), and D (Normalized Distance)

Project: Software Pathfinder

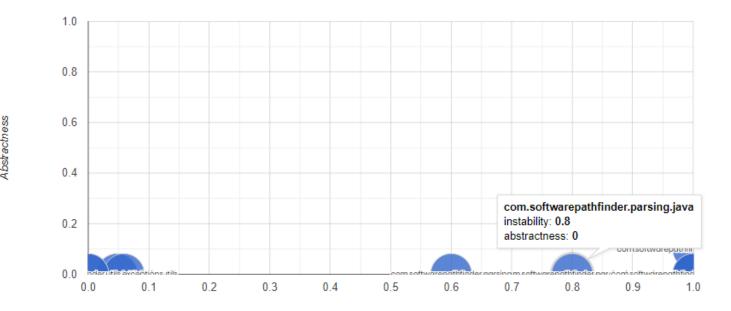

Instability and Abstractness Visualization

Abstractness degree (y axis) and Instability (x axis)

Project: Software Pathfinder

32 Heurísticas de Análise

drtools.dev

Heurísticas - Summary

- 1. Contexto que fornece informações gerais sobre dimensões do Projeto Indicativo de filtrar melhor as informações usando a opção '--top X' para ajudar no entendimento (Classificação: SMALL, MEDIUM e LARGE)
- 2. Considere o número médio de classes por namespace Indicativo de que as classes não estão distribuídas uniformemente
- 3. Avalie o número médio de SLOC por classes Indicativo de classes muito grandes
- 4. Observe a distribuição média de métodos por classes Indicativo de muitos comportamentos por classe
- 5. Considere a complexidade média por classes Indicativo de como está a complexidade das classes em geral

Heurísticas - Namespaces

6. Observe a distribuição de classes por namespace

Se um namespace tem muitas classes (NOC alto), pode ser um indicativo de 'promiscuous package'

 7. Avalie a distribuição de tipos abstratos (classes abstratas, interfaces) por namespaces

Indicativos para extensão e reuso

8. Avalie a relação das métricas NOC e NAC do namespace

Uma diferença muito grande entre eles pode indicar uma má distribuição entre tipos abstratos e tipos concretos

Heurísticas – Types (1)

- 9. Avalie as métricas além do SLOC WMC, DEPS (DEP e I-DEP) e NOM/NPM são bons indicativos de como está a classe
- 10. Classe com NOA alto, mas baixo WMC e NOM alto Pode ser um indicativo de POJO (Plain Old Java Object)
- 11. SLOC alto, mas sem muitos métodos (NOM/NPM baixo)

 Pode ser um indicativo de 'long methods'
- 12. SLOC e WMC alto, mas sem muitos métodos (NOM/NPM baixo)

 Pode ser um indicativo de 'complex class'
- 13. NOM/NPM alto pode ser indicativo de classe com muitas responsabilidades

Indica baixa coesão e possivelmente 'god class'

Heurísticas – Types (2)

- 14. NOM/NPM alto e NOA baixo pode ser indicativo de classe com muitas responsabilidades
 - Pode ser um indicativo de uma classe 'controller'
- 15. NOM alto e NPM baixo pode indicar que o comportamento foi dividido Indicativo de métodos private/protected/default
- 16. NOA alto pode ser indicativo de classe com muitas responsabilidades Pode ser um indicativo de baixa coesão, dificultando a manutenção
- 17. DEP alto e I-DEP baixo pode indicar uma classe com muitas dependências externas Dependências de APIs externas (frameworks, libs)
- 18. I-DEP alto (e por consequência DEP alto), pode indicar uma classe com muitas dependências de classe do projeto *Incidência de alto acoplamento*

Heurísticas - Methods

- 19. PARAM alto pode ser indicativo de método com baixa coesão Possivelmente é um 'long method'
- 20. CYCLO alto e MLOC baixo pode ser um 'complex method' Indicativo de problema de complexidade, legibilidade e entendimento
- 21. NBD alto pode ser um 'complex/long method' Indicativo de problema de complexidade, legibilidade e entendimento
- 22. CALLS alto pode indicar alto acoplamento Indicativo de problema de várias dependências
- 23. MLOC alto, CYCLO alto, CALLS alto e NBD alto é forte indicativo de mais de um problema

Pode ser um indicativo de um 'complex/long method'

Heurísticas - Coupling (1)

- 24. Evite dependência cíclicas
- Tornam as mudanças complexas e gera a 'síndrome da compilação total'
- 25. CA alto pode indicar que o namespace é estável Se ele mudar, vai fazer com que quem dependa dele seja alterado
- 26. CE alto pode indicar que o namespace é instável

 A incidência de mudança em outros namespaces que ele depende vai
 fazer com que ele mude

Heurísticas – Coupling (2)

- 28. Se I=0, indica que CA > 0 e CE=0, indica uma estabilidade total

 Ele é responsável e independente. Os dependentes tornam difícil alterálo e não tem dependência de outros que pode forçar a mudança
- 29. A indica como está o grau de abstração do namespace A=0, namespace não tem tipos abstratos; A=1, namespace somente possui tipos abstratos

Heurísticas – Coupling (3)

30. Considere namespaces que estão nas zonas de exclusão

Zone of Pain (namespaces com l e A próximos a 0) e Zone of Uselessness (namespaces com l e A próximos a 1)

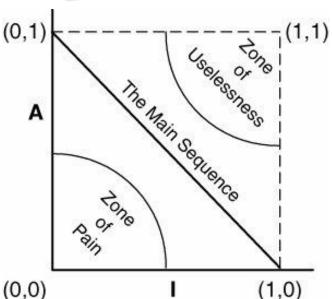

31. Namespace situado próximo a sequência principal indica que não é abstrato nem instável demais

Valor de D (entre 0 e 1) que vai indicar a posição na sequência principal

32. D indica o quão longe um namespace está da sequência principal

D próximo a 0 indica proximidade da sequência principal; D próximo a 1, indica distância da sequência principal

Estes valores (mais próximo a 1) podem indicar quando um namespace está passível de manutenção e menos sensível a mudanças
